DETAILED ACTION

Reasons for Allowance

1. Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1 and 7, the prior, Sasano fails to teach monitoring the message exchange on the D channel to obtain first Call Appearance information. Sasano teaches subaddress (see section 2.3.5 of 1999 Version of the Bellcore National ISDN BRI Terminal Equipment (TE) Generic Guidelines having SR-4620, Issue 1, December 1998) which is different than Call Appearance information (see section 2.4 of 1999 Version of the Bellcore National ISDN BRI Terminal Equipment (TE) Generic Guidelines having SR-4620, Issue 1, December 1998).

Regarding claims 1 and 7, Examiner's newly discovered reference, Davidson fails to teach: generating a first call from a first Primary Directory Number (PDNI) to a second Primary Directory Number (PDN2) within a single BRI circuit and

Examiner's newly discovered reference, Lee fails to teach monitoring the message exchange on the D channel to obtain first Call Appearance information

The reference, Davidson teaches monitoring the message exchange on the D channel to obtain first Call Appearance information in a non-key system whereas, reference, Lee teaches each of two B-channels are assigned a directory number without having any Call Appearance information. The addition of a first Primary Directory Number (PDNI) and a second Primary Directory Number (PDN2) within a single BRI circuit would have required substantial structural to Davidson and the addition of Call Appearance information would have required substantial

structural to Lee. Therefore, it is not obvious to modify Davidson in view of Lee to teach generating a first call from a first Primary Directory Number (PDNI) to a second Primary Directory Number (PDN2) within a single BRI circuit.
